Hands-on Training

1st Annual Alleman-Deliperi Biomimetic review

We invite you to join us October 22-24 for our 2nd annual Alleman-Deliperi Biomimetic Review. The course will be held in South Jordan, Utah. Simone Deliperi will speak on Thursday about his "Stress-Reduced Direct Composite technique" (SRDC). We presented this technique at a table clinic presentation at the Academy of Operative Dentistry this February in Chicago. We also presented an oral presentation of our abstract at the International Association for Dental Research this past April in Miami Beach. Our paper describing this technique has been published online in PPAD. On Friday I will review the literature pertaining to the Six Lessons approach to biomimetic reconstruction. On Saturday Dr. Mike Alpern will speak on Biomimetic Occlusion featuring his "POLY" articulator with the movable mandible. 10 Six Lessons graduates went to Florida in January for a 2 day seminar with Dr. Alpern. Dr. Georgene Chase will give a report on this new knowledge for treating complex TMD cases biomimetically. Dr. Lorin Berland from Dallas, Texas will also be giving a presentation on 15 years of success with chair-side inlay/onlay biomimetic treatment. Lorin is selling a CD that will introduce semi-direct treatment to thousands of dentists around the world. The fee for the course is \$750. RSVP by e-mail at allemancenter@gmail.com. Every Biomimetic Dentist should come to keep their techniques "as simple as possible...but not simpler" (Bertolotti/Einstein).
